# QuickShip Products Program

It's no secret that quality lighting is crucial for production and safety - and downtime is not an option. That's why AZZ is pleased to introduce a QuickShip program designed to deliver a wide selection of our core products within days; helping you meet tight project deadlines or restore safe and efficient illumination quickly.

Fixtures for many applications can be shipped in 2 to 3 days. If it's an emergency, no problem, we can ship these selected products in 24 hours for a nominal fee (please note orders for 24 hour delivery must be placed by 12:00 PM CST). Quantity limitations apply.
